

### SAFETY DATA SHEET Slip Lock® Limited Slip Additive

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

| 1. Identification                |   |
|----------------------------------|---|
| Product identifier               |   |
| Product name                     | Slip Lock® Limited Slip Additive  |
| Product number                   | ADA   |
| Recommended use of the che       | emical and restrictions on use  |
| Application                      | Additive for motor oil.   |
| Uses advised against             | Avoid the formation of mists.   |
| Details of the supplier of the s | afety data sheet  |
| Supplier                         | AMSOIL INC.<br>Bordner, Ladner, Gervais<br>Scotia Plaza, 40 King St W<br>Toronto, ON, Canada M5H 3Y4<br>T: +1 416-367-6547                        |

| The full text for all hazard sta  | atements is displayed in Section 16.   |  |
| Composition comments  | The exact percentage is withheld as a trade secret in accordance with 29 CFR 1910.1200.  |  |
| 4. First-aid measures   |  |  |
| Description of first aid measured   | ures   |  |
| General information   | Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.   |  |
| Inhalation  | Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.   |  |
| Ingestion   | Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water<br>or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head<br>should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an<br>unconscious person. Move affected person to fresh air and keep warm and at rest in a<br>position comfortable for breathing. Place unconscious person on their side in the recovery<br>position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing<br>such as collar, tie or belt. |  |
| Skin Contact  | Remove contamination with soap and water or recognized skin cleansing agent. Get medical attention if symptoms are severe or persist after washing.  |  |
| Eye contact   | Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.  |  |
| Protection of first aiders  | First aid personnel should wear appropriate protective equipment during any rescue. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.   |  |
| Most important symptoms an  | nd effects, both acute and delayed   |  |
| General information   | See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.   |  |
| Inhalation  | A single exposure may cause the following adverse effects: Irritation of nose, throat and airway. Prolonged inhalation of high concentrations may damage respiratory system.   |  |
| Ingestion   | May cause irritation. May cause discomfort if swallowed. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.   |  |
| Skin contact  | Redness. Irritating to skin.   |  |
| Eye contact   | May cause temporary eye irritation.  |  |
| Indication of immediate medical attention and special treatment needed                    |  |  |
| Notes for the doctor  | Treat symptomatically.   |  |

#### 5. Fire-fighting measures

| The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.  |
|---|
| Do not use water jet as an extinguisher, as this will spread the fire.  |
| he substance or mixture   |
| Containers can burst violently or explode when heated, due to excessive pressure build-up.<br>Contains Hydrocarbons. The product is immiscible with water and will spread on the water<br>surface.  |
| Hydrocarbons. Carbon monoxide (CO). Carbon dioxide (CO2).   |
|   |
| Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. |
| Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable.   |
|   |

#### 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| Personal precautions      | No action shall be taken without appropriate training or involving any personal risk. Keep<br>unnecessary and unprotected personnel away from the spillage. Wear protective clothing as<br>described in Section 8 of this safety data sheet. Follow precautions for safe handling<br>described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure<br>procedures and training for emergency decontamination and disposal are in place. Do not<br>touch or walk into spilled material. Avoid contact with skin and eyes. Use protective equipment<br>appropriate for surrounding materials. |
|---------------------------|---|
| Environmental precautions |   |
| Environmental precautions | Immiscible with water. Very toxic to aquatic life with long lasting effects. Absorb spillage with non-combustible, absorbent material. Avoid discharge into drains or watercourses or onto the ground. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).   |

Methods and material for containment and cleaning up

| Methods for cleaning up                | Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Absorb spillage with sand or other inert absorbent. Collect and place in suitable waste disposal containers and seal securely. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labeled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. |
|--|--|
| Reference to other sections            | For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.  |
| 7. Handling and storage                |  |
| Precautions for safe handling          |  |
| Usage precautions                      | Read and follow manufacturer's recommendations. Wear protective clothing as described in<br>Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs.<br>Handle all packages and containers carefully to minimize spills. Keep container tightly sealed<br>when not in use. Avoid the formation of mists. Do not handle until all safety precautions have<br>been read and understood. Do not handle broken packages without protective equipment. Do<br>not reuse empty containers. Avoid contact with used product.   |
| Advice on general occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.  |
| Conditions for safe storage, in        | cluding any incompatibilities  |
| Storage precautions                    | Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage.  |
| Storage class                          | Chemical storage.  |
| Specific end uses(s)                   |  |
| Specific end use(s)                    | The identified uses for this product are detailed in Section 1.  |
| 8. Exposure Controls/persona           | I protection   |
| Ingredient comments                    | No exposure limits known for ingredient(s).  |
| Exposure controls                      |  |
| Appropriate engineering<br>controls    | Provide adequate ventilation. Personal, workplace environment or biological monitoring may<br>be required to determine the effectiveness of the ventilation or other control measures and/or<br>the necessity to use respiratory protective equipment. Use process enclosures, local exhaust<br>ventilation or other engineering controls as the primary means to minimize worker exposure.<br>Personal protective equipment should only be used if worker exposure cannot be controlled<br>adequately by the engineering control measures. Ensure control measures are regularly<br>inspected and maintained. Ensure operatives are trained to minimize exposure.   |

Flash point

## Slip Lock® Limited Slip Additive

| Eye/face protection             | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.  |
|---------------------------------|--|
| Hand protection                 | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.   |
| Other skin and body protection  | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.  |
| Hygiene measures                | Provide eyewash station and safety shower. Contaminated work clothing should not be<br>allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment<br>and the work area every day. Good personal hygiene procedures should be implemented.<br>Wash at the end of each work shift and before eating, smoking and using the toilet. When<br>using do not eat, drink or smoke. Preventive industrial medical examinations should be carried<br>out. Warn cleaning personnel of any hazardous properties of the product.  |
| Respiratory protection          | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is NIOSH approved. Check that the respirator fits tightly and the filter is changed regularly. Full face mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Gas and combination filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work. SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation on health and safety at work. SOR/86-304, Part XII (12.7), and any relevant provincial regulation on health and safety at work. SOR/86-304, Part XII (12.7), and any relevant provincial regulation on health and safety at work. SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. |
| Environmental exposure controls | Keep container tightly sealed when not in use.   |
| 9. Physical and Chemical Pro    | perties  |
| Information on basic physical   | and chemical properties  |
| Appearance                      | Liquid.  |
| Color                           | Amber.   |

| Auto-ignition temperature   | Not available.  |
| Decomposition Temperature   | Not available.  |
| Viscosity   | 42.1 cSt @ 40°C<br>6.6 cSt @ 100°C<br>[ASTM D 445]  |
| Explosive properties  | Not considered to be explosive.   |
| Oxidizing properties  | Does not meet the criteria for classification as oxidizing.   |
| Other information   | No information required.  |
| 10. Stability and reactivity  |   |
| Reactivity  | See the other subsections of this section for further details.  |
| Stability   | Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.   |
| Possibility of hazardous reactions                                  | No potentially hazardous reactions known.   |
| Conditions to avoid   | There are no known conditions that are likely to result in a hazardous situation.   |
| Materials to avoid  | Oxidizing agents. Acids - oxidizing.  |
| Hazardous decomposition products                                    | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. |
| 11. Toxicological information                                       |   |

| Reproductive toxicity - fertility                 | Based on available data the classification criteria are not met.   |
| Reproductive toxicity -<br>development            | Based on available data the classification criteria are not met.   |
| Specific target organ toxicity -                  | single exposure  |
| STOT - single exposure                            | Not classified as a specific target organ toxicant after a single exposure.  |
| Specific target organ toxicity -                  | repeated exposure  |
| STOT - repeated exposure                          | May cause damage to organs through prolonged or repeated exposure.   |
| Target organs                                     | Gastro-intestinal tract Immune system Liver  |
| Aspiration hazard                                 |  |
| Aspiration hazard                                 | Based on available data the classification criteria are not met.   |
| General information                               | The severity of the symptoms described will vary dependent on the concentration and the length of exposure.  |
| Inhalation  | A single exposure may cause the following adverse effects: Irritation of nose, throat and airway. Prolonged inhalation of high concentrations may damage respiratory system. |
| Ingestion   | May cause irritation. May cause discomfort. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.                                    |
| Skin Contact                                      | Irritating to skin. Redness.   |
| Eye contact                                       | May cause temporary eye irritation.  |
| Route of exposure                                 | Ingestion Inhalation Skin and/or eye contact   |
| Target Organs                                     | No specific target organs known.   |
| Medical considerations                            | Skin disorders and allergies.  |
| 12. Ecological Information                        |  |
|   |  |

Toxicity

Very toxic to aquatic life with long lasting effects.

Persistence and degradability

|   | The degradability of the product is not known.   |
|---|--|
| Bioaccumulative potential   |  |
| Bio-Accumulative Potential  | No data available on bioaccumulation.  |
| Partition coefficient   | Not available.   |
| Mobility in soil  |  |
| Mobility  | The product is insoluble in water.   |
| Other adverse effects   |  |
| Other adverse effects   | None known.  |
| 13. Disposal considerations   |  |
| Waste treatment methods   |  |
| General information   | The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. |
| Disposal methods  | Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration or landfill should only be considered when recycling is not feasible.  |

#### **US Federal Regulations**

SARA Section 302 Extremely Hazardous Substances Tier II Threshold Planning Quantities None of the ingredients are listed or exempt.

CERCLA/Superfund, Hazardous Substances/Reportable Quantities (EPA) None of the ingredients are listed or exempt.

SARA Extremely Hazardous Substances EPCRA Reportable Quantities

None of the ingredients are listed or exempt.

#### SARA 313 Emission Reporting

None of the ingredients are listed or exempt.

CAA Accidental Release Prevention None of the ingredients are listed or exempt.

SARA (311/312) Hazard Categories None of the ingredients are listed or exempt.

**OSHA Highly Hazardous Chemicals** None of the ingredients are listed or exempt.

#### **US State Regulations**

California Proposition 65 Carcinogens and Reproductive Toxins None of the ingredients are listed or exempt.

California Air Toxics "Hot Spots" (A-I) None of the ingredients are listed or exempt.

California Air Toxics "Hot Spots" (A-II) None of the ingredients are listed or exempt.

California Directors List of Hazardous Substances None of the ingredients are listed or exempt.

Massachusetts "Right To Know" List None of the ingredients are listed or exempt.

Rhode Island "Right To Know" List None of the ingredients are listed or exempt.

Minnesota "Right To Know" List None of the ingredients are listed or exempt.

New Jersey "Right To Know" List The following ingredients are listed or exempt: Bis(2-ethylhexyl) hydrogen phosphate

**Pennsylvania "Right To Know" List** None of the ingredients are listed or exempt.

#### Inventories

Canada - DSL/NDSL All the ingredients are listed or exempt.

US - TSCA All the ingredients are listed or exempt.

US - TSCA 12(b) Export Notification

None of the ingredients are listed or exempt.
